

New Paint Techniques Add Finishing Touch to Your Products

CalCo is always utilizing the latest technology that will visually enhance their customers' products. They want to captivate your prospective client's interests at first glance causing them to interact and engage your product immediately as a response. They give your blue collar hard working products the look of a twenty-something supermodel. CalCo's paint technicians are constantly stretching the boundaries of modern paint technologies and techniques.

It really doesn't matter if you want a true rugged industrial class finish or if you want your product to resemble a crown jewel. Their expert paint technicians are passionate about meeting and exceeding your visual expectations. Some of the finishing departments latest offerings include: Thermal reactive color change finish, super metal-

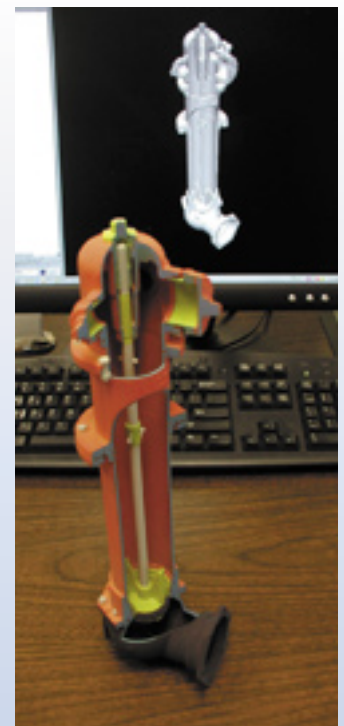

lic base coats with unequaled light refraction, and the Ultra Exotic Textured finish with 3-dimensional depth. 

Product Prototyping: The Best Solution Since Sliced Products!

Whether you are looking for a solution for a lightweight and interactive sales tool to take on the road, or you need a prototype of the newest component ASAP, CalCo's new full color HDP (High Definition Prototyping) process is your best bet. Quick turn around and accurate representation of your product from the original 3D drawings is what makes this the best solution yet. Having a physical model that you can produce at every trade show and client meeting is invaluable. If they can see it, touch it and feel it, your clients will have a hard time forgetting your product. 

Brand Embroidered Durable Protection

CalCo is well known for their resourcefulness when it comes to protecting the integrity of a clients' product. From rugged custom fitted cases, to top of the line, made to order shipping containers, the hard working folks at CalCo consistently develop functional ways to protect your products and at the same time maximize brand awareness.

Here is just one more example of their ingenuity: When a prominent Nissan automobile dealer commissioned CalCo to do some engine cutaways for them, CalCo went all out on showroom quality. This even included an elegant yet incredibly durable nylon slip engine covers with the Nissan logo embroidered directly on it. You'd think it came straight from the Detroit Auto Show for a class "A" unveiling. But that's the idea isn't it? 

CalCo Gets The Vote From Congress!

On August 18th, Illinois Congressman Donald A. Manzullo (R-IL) visited the CalCo headquarters. Representative Manzullo is the Chairman of the House Committee on Small Business. He founded and chairs the bipartisan House Manufacturing Caucus, the House Machine Tool Caucus, and the House Precious Metals Caucus.

Over the past several years he has held more than 60 hearings highlighting the absolute need to preserve America's Manufacturing Industry. Congressman Manzullo's goal is to make certain that American Manufactures are equipped and competing on a level playing field internationally. He is utilizing resources to expose and eliminate any artificially enhanced advantage of foreign markets over U.S. manufacturers. Congressman Manzullo continues to establish himself as an American working for America, both locally and on a National level. Here is a quote in relation to his visit at CalCo:

"It was wonderful to visit with the employees at CalCo Cutaways in Cary. It was easy to see why the company is so successful. CalCo boasts an energized staff making a quality product that is unique and in high demand. CalCo has all the attributes for success. As Chairman of the U.S. House Committee on Small Business and Chairman of the House Manufacturing Caucus, I am proud to represent companies like CalCo with leadership and employees who possess the energy and ingenuity necessary to continue America's industrial dominance." 

Let CalCo Know What You Think
