

# The Better In-line Industrial Gas Heater

For Single Cylinder Service\*

from **CalCo**  
the maker of the famous McILRATH heaters

## Exclusive features

- **Submerged heat source** ... all the heat goes into the block
- **Patented motionless mixer** ... maximizes heat transfer
- **Safe surface temperature** ... non-metallic sheath insulates and materially reduces surface temperature and possibility of burns
- **"Potted" insulation** ... imbeds and gives total protection to electrical components
- **Installs between cylinder and regulator** with standard regulator wrench. Attach a standard extension cord and you're ready for trouble free service.
- **Ends CO<sub>2</sub> and other industrial gas regulator freezeups** with dependability, safety, efficiency and convenience.

\*Important: The CalCo in-line heater has limited capacity, as do all cartridge heaters ... generally that of single cylinder service. For greater flow rates, select a McILRATH heater. Write us for a bulletin on this lineup of high capacity heaters.
