

November 14, 2013

Neil,

I wanted to express my gratitude for your recommendation of fitting our core production operations with Calco's In-Line tank heater. It works fabulously! Not only has it sped up production, it maximizes the effectiveness of the gassing operation. The truly unforeseen bonus is the operators' increased comfort level as the gassing cuff remains at close to room temperature on high volume gas cycles. I would recommend these heaters to anyone with a similar environment. Thanks again !

Best regards,

Derek Horton
